

CV Andreas Flache – as of January 2026

A Short biography

Andreas Flache is professor of sociology, in particular modeling norms and networks, at the sociology department of the Faculty for Behavioral and Social Sciences, at the University of Groningen, The Netherlands. His main research addresses polarization, intergroup relations in a diverse society, opinion dynamics, cooperation problems, social networks and social learning. In his research, Flache applies agent based computational modelling and game theoretical modeling, laboratory experiments, and network research.

Flache has published in social science flagship journals like American Journal of Sociology, Journal of Conflict Resolution, Organization Science, as well as in multidisciplinary journals like the Proceedings of the National Academy of Sciences or Science, and specialized journals like Sociology of Education, Rationality and Society, or Journal of Mathematical Sociology.

He is also currently the director of research of the department of Sociology of the University of Groningen and the scientific director of the ICS (Interuniversity Center for Social Science Theory and Methodology), a leading research and training center in Dutch Sociology. Further, Flache is currently editor-in-chief of the scientific journal “Rationality & Society” (Sage). In 2023, he has been appointed as a member of the European Academy of Sociology.

Flache has a master’s degree (Diplom) in computer science (1991) and a PhD in Sociology (1996). From 1999-2004, Flache was research fellow of the Royal Netherlands Academy of Arts and Sciences (KNAW). In 2004, Flache received an NWO-VIDI grant for the research project “The importance of timing and structure: modeling effects of interpersonal contacts on social cohesion in diverse groups” that he conducted as principal investigator from 2005 to 2010. In 2017 Flache was one of 17 co-applicants (PI: Wittek) of the successful proposal for the NWO-gravity program SCOOP (Sustainable Cooperation, 18.8M), a major interdisciplinary effort to study conditions and mechanisms of sustainable cooperation in families, communities and organizations. 2018 Flache was main-applicant of the successful ORA proposal ToRealSim (“Towards realistic computational models of social influence dynamics”) (1.2M), an effort by teams from the Netherlands, Germany, UK and France to link computational modelling of opinion dynamics with empirical research in experiments, social networks and surveys.
